BYD BLADE BATTERIES

Nerva is the only motorcycle brand that has access to **BYD's** Blade battery technology, which has proven to be the safest to date, passing all types of tests.

One of the main challenges of electric mobility is directly related to the **thermal stability and safety** of batteries. A challenge that **Nerva** overcomes with the help of the Asian giant **BYD** thanks to the technology of **Blade batteries**, capable of remaining practically intact even in accidents that include perforation.

Reliability, stability and security
